INFORMATION: During the first week of school, students will be instructed on how to organize their notebooks and school supplies. Proper organization is ESSENTIAL for the learning process. It is therefore important for each student to bring his/her supplies the first week of school. Organization is an on-going life skill. Most sixth graders find this very difficult. By teaching and maintaining organizational skills in the classroom, teachers give students a gift that will enhance the quality of their lives as well as better grades.
