

Floyd County Schools will be using Google Classroom as the digital learning platform during the extended school closure due to COVID-19. Below you will find some important information for helping your child access their work.

- Teachers will be including resources to reflect the curriculum they are currently learning in the class. These resources include teacher-created materials and familiar online tools.
- Teachers will post assignments by 9:00 a.m. each day in Google Classroom. Please be aware that some teachers may choose to post assignments for multiple days in advance.
- Your child can sign into Google Classroom using their school email account at classroom.google.com or the FCS Student Links page (www.tinyurl.com/fcslinks).
- The FCS Student Links page will contain any additional links that students need to access during the extended school closure.
- The choice of using Google Classroom or a paper alternative will be determined by each school.

Additional Parent Resources:

If you are looking for additional tools to help support student learning during the COVID-19 extended school closure, please visit the student links page or these additional resources:

- Khan Academy
